### **Permanent Hair Removal**

At Burnett Medical Centre, our medically trained professionals work with you to permanently remove unwanted hair from your face or body in the comfort of our accredited Bundaberg medical clinic.

We offer the latest in Intense Pulsed Light (IPL) to remove hair from your face or body. Our IPL process is virtually pain free and is suitable for men and women. Typically, in five to 10 sessions you will have achieved your desired outcome and will usually only require "top up" visits a few times per year to maintain smooth and hair-free skin.

#### **IPL permanent hair removal**

**Step one** - Initial consultation, skin cancer check-up and patch test.

**Step two** - choose which face and body areas you would like to treat.

Bikini	\$48
G-string bikini	\$52
Brazilian	\$62
Half back	\$99
Full back	\$150
Chest	\$99
Brazilian and underarm	\$62

Ask about our customised packages to suit your specific situation.

## How does IPL work?

Laser hair removal is one of the most popular aesthetic procedures. Our latest technology is fast and convenient, and we can treat small to large body and face areas with minimal discomfort.

Broad spectrum pulsed light is transmitted through a continuously cooled applicator, gently placed over the skin.

The pulsed light is targeted at the base of the hair follicle making the hair go into its resting phase. The treated hair you have falls out, and gradually your body grows less hair in that area.

## Frequently asked questions

### ***Is IPL safe?***

For most people, laser hair removal is safe. The procedure isn't linked to any long-term side effects and minor side effects are rare.

### ***Will the hair grow back?***

Depending on your skin tone, sex and hormone levels, some clients may experience a light hair regrowth in the treated area. These new hairs can be treated with single top-up sessions as needed.

### ***How many treatments will I need?***

This will depend on the colour of the hair and strength of your hair follicle. However, most clients achieve permanent hair removal with five to 10 sessions of the selected area.

Your IPL sessions will be booked every four weeks to target each new stage of hair growth.

## **Skin care by Burnett Medical Centre**

Dr Ayobami Adeniji will provide you with instructions for caring for your skin following your specific treatment. You will need to avoid sun exposure, strenuous workouts, dry saunas, and steam rooms following your sessions.

## **Next steps ...**

Book in for a skin assessment and consultation with Dr Ayobami Adeniji who will explain in more detail how each treatment works, ask you questions about your medical history and medications. Dr Ayobami Adeniji will explain any risks and conduct an IPL test patch to assess your skin suitability.
