Skin enhancements fact sheet, V3 7 August 2020

Skin Enhancements

Remove fine lines and pigmentation, facial capillaries, treat acne and acne scarring and rosacea with our range of clinical skin enhancement treatments at Burnett Medical Centre.

Book in for a skin consultation and assessment with one of our friendly doctors where we will explain the different options for enhancing the appearance of your skin on your face or body.

Our different skin treatments include:

- Intense Pulsed Light (IPL)
- Microdermabrasion
- Professional peels

For a revitalised and refreshed looking you.

Intense Pulsed Light (IPL)

IPL can assist with removing brown spots and skin redness caused by damage from sun exposure and ultraviolet (UV) rays. IPL can also assist with treating facial capillaries, acne or scarring from acne.

IPL creates photo-rejuvenation to stimulate collagen production in the skin cells. The procedure is virtually pain free.

Patients typically require five to 10 treatments depending on skin type, age and gender with top up sessions recommended every three to six months to maintain your refreshed appearance.

IPL pricing

Nose and cheeks	\$120
Half face	\$150
Full face	\$220
Neck	\$110
Decolletage	\$220
Face, neck and décolletage	\$440

Shoulders	\$190
Lower arms	\$280
Full arms	\$350
Upper back	\$300
Skin rejuvenation and hair removal packages	Customised package

Ask about our customised packages to suit your specific situation.

Microdermabrasion

Microdermabrasion is a gentle and pain-free, deep exfoliating process that removes the surface layer of skin. After a few sessions, the new skin layer usually appears smoother and younger looking.

Microdermabrasion can improve the appearance of sun damage, wrinkles, fine lines, age spots, acne and acne scarring.

Microdermabrasion pricing

Full face	\$79
Face, neck and décolletage	\$99
Face, neck and décolletage (three pack)	\$240
Face, neck and décolletage (six pack)	\$480

Professional peels

Professional skin peels promote healthy, smooth and more youthful skin tones.

A professional skin peel involves a consultation with your doctor who will recommend either an in-clinic or take-home treatment depending on the treatment purpose and your skin type.

With professional peels, most people feel a light burning sensation that lasts about five to ten minutes, followed by a stinging sensation. Your Doctor or Nurse will provide you with more information and ensure you are comfortable during and after your procedure.

A light chemical peel can improve skin texture and tone, remove congested skin, as well as decrease the appearance of fine wrinkles. A more intense peel can be used to treat sun damage. Top up sessions are recommended every six months to maintain the results.

Professional peel pricing

Full face and neck	\$200
